Re: New Exceptional Sound Speaker SP-10/ SP-20

We are very pleased to introduce two new **SP-10 & SP-20 External Sound Speakers**; appealing additions for any ham shack with a FT-991/FT-991A, FTDX 1200 and/or a FTDX 3000D in the operating position.

The **SP-10** is designed to fit perfectly alongside the widely popular FT-991/FT-991A while the **SP-20** speaker is an attractive match for the FTDX3000D and FTDX1200. Both speakers reproduce the high-quality output sound these receivers generate thereby providing clear and crisp audio for reliable communications on all HF and V/UHF bands.

Along with the recently released **M-1 Reference Microphone**, the new **SP-10 & SP-20 External Sound Speakers** are highly functional yet very attractive accessories certain to increase the enjoyment of the various ham radio operations such as long distance communications with SSB, V/UHF casual operations with C4FM digital, and VoIP communications through the WiRES-X.

The new **SP-10** and **SP-20** will be available **January 2017**.

SP-10 External Speaker for FT-991A/ FT-991 SP-20 External Speaker for FTDX3000D/ FTDX1200

Specifications:

Model	Maximum Input Power	Speaker Impedance	Dimensions (W x H x D)	Weight
